CUSTOMER REVIEW

Globex Retail | July 2026

Review scope

This review covers business activity during April-June 2026.

Overall Status

Globex continues to expand its use of the platform. The primary objective during the quarter was increasing adoption across store managers and reducing manual reporting processes.

The rollout progressed slower than originally planned due to internal training delays.

Results

- Active users increased from 410 to approximately 600.
- Adoption rate at the end of June was reported as 68%.
- Automated reports increased from around 1,200 per month to more than 2,000.
- Customer satisfaction remained stable at 8.4/10.

What went well

- Training sessions for regional managers were completed.
- The automated weekly reporting workflow was successfully introduced.
- The customer reported an estimated saving of approximately 25 hours of manual work per week.

ITEMS REQUIRING ATTENTION

Some store managers continue to use spreadsheets instead of the platform.

Mobile login issues were reported by several users during June.

Internal Note: The June adoption dashboard currently shows 64% adoption, while the customer success summary reports 68%. This should be reviewed.

Q3 Focus

- Increase store-manager adoption.
- Resolve mobile authentication issues.
- Expand automated reporting.

Follow-up

Mobile authentication investigation - Product Team - July

Additional training session for store managers - no owner assigned yet.

Adoption review - Michelle - 01/08/26
