QBR NOTES

Customer: Contoso Manufacturing
Meeting date: 07/07/2026
Prepared by: Customer Success

Good quarter overall.

Customer completed migration of the Production Planning team during the quarter. Approximately 320 employees now have access to the system. Usage increased considerably after the migration.

Numbers mentioned during the review

- Licensed users: 500

- Active users: 318

- Weekly active users: around 270

- API requests: 1.8M

- System availability: 99.94%

- Open critical support cases: 1

- Last quarter active users were approximately 250.

Main achievements

- Production Planning migration completed.

- ERP integration moved to production.

- First automated inventory reconciliation workflow deployed.

Issues discussed

ERP synchronization occasionally fails during overnight processing. The customer believes the issue occurs two or three times per week. No confirmed root cause yet.

One critical support case remains open.

Customer priorities

- Improve ERP synchronization reliability.

- Increase adoption within warehouse teams.

- Start implementation of automated supplier reconciliation.

Actions from meeting

Tom - review ERP sync logs.

Customer IT team to provide examples of failed transactions.

Schedule architecture session.

Supplier reconciliation workshop planned for August.

No dates were agreed for the first two items.
