Orion Insurance Group

Quarterly Business Review — Q3 FY2026

Reporting period: Q3 of fiscal year 2026 (October 1 – December 31, 2025). Orion's fiscal year starts on July 1.

Prepared by Helix Consulting on behalf of the Customer Success team · January 12, 2026

1. Executive summary

Claims automation went live for the Motor line in November, and straight-through processing improved for the second consecutive quarter. SLA performance dipped in December because of the seasonal claims peak. Orion's leadership confirmed budget for the Home line rollout in Q4 FY2026.

2. Objectives for the quarter

- Launch claims automation for the Motor line.
- Reach 40% straight-through processing (STP) for eligible claims.
- Keep claims processed within SLA at or above 95%.

3. Scorecard

Metric	Target	Q2 FY26	Q3 FY26	Status
Straight-through processing	40%	31%	42%	Achieved
Claims processed within SLA	≥ 95%	96.2%	93.1%	Missed
Average claim cycle time (days)	—	6.8	5.9	—
Customer complaints	—	57	61	—
Active adjusters on platform	—	210	248	—

4. Action items from the previous QBR (Q2 FY26)

Action	Owner	Status
Finalize Motor claims rules	Orion Claims Ops	Done
Train adjusters on the new workflow	Helix Consulting	Done
Migrate historical claims data	Orion IT	In progress (see Next steps)

5. Challenges

The December claims peak pushed SLA performance below target. Complaints rose slightly, mainly about status notifications not being sent for automated claims.

6. Risks

If the historical data migration slips beyond February 2026, the Home line rollout may be delayed. Mitigation: weekly migration checkpoint.

Key-person dependency: only one Orion analyst maintains the automation rules.

7. Next steps

Action	Owner	Due
Fix status notifications for automated claims	Helix Consulting	by Jan 31

Complete historical claims data migration	Orion IT	February 2026
Home line rollout plan	VP Operations (Orion)	March 15, 2026
Assign a second automation rules analyst	Orion HR	TBD
