Subject: Q1 2026 review recap — Meridian Hotels & Resorts

Hi all,

Thanks for a productive session on Tuesday. Quick recap below.

**Where we landed this quarter**

Direct bookings through the platform reached 12.4k, up from 8.7k in Q4. Note: in the last QBR we reported 9.1k for Q4; the corrected figure is 8.7k after removing duplicate test bookings. The target for Q1 was 15k, so we're behind, mostly because the Lisbon and Porto properties only went live in mid-March.

Guest NPS moved from 31 to 38. Average check-in time at the kiosks is now under 2 minutes (it was around 4 minutes before the upgrade).

**What went well**

The kiosk upgrade is live in all 14 properties. The loyalty integration passed UAT on the first attempt.

**What didn't**

Lisbon and Porto went live late (vendor hardware delay). Front-desk staff in two properties are still printing paper registration cards.

**Risks**

No major risks identified this quarter.

**Next steps**

- I'll send the updated integration spec by end of next week.
- Marco (Meridian IT) to confirm the Wi-Fi upgrade schedule for Porto.
- Joint workshop on the Q2 upsell campaign — date to be agreed.
- Q2 target: 18k direct bookings.

Best,
Dana
